1 Introduction

1.1 Summary

The purpose of EAI Evergreening Schedule and Approach document is to communicate the software components planned for upgrade or installation to support the EAI Architecture for Fiscal Year 2003.

The document is summarized in the following sections:

- **Section 2:** *Evergreening Approach* - Provides an overview of the Evergreening approach.
- **Section 3:** *Software Upgrades* – Provides detail of the vendor patches, point, or maintenance releases to be applied to existing software in the EAI Architecture.
- **Section 4:** *New Software* - Provides detail of new software to be added to the EAI Architecture.
- **Section 5:** *Future Software Changes* – Provides a summary of the known software changes not in the current Evergreening scope, but on the horizon and should be considered in future planning.
- **Section 6:** *Evergreening Schedule* - Provides an overview of the Evergreening implementation schedule.

2 Evergreening Approach

Evergreening is the process of updating existing software and/or adding new software to the existing EAI Architecture. The key drivers for initiating any change to the architecture include:

- FSA business needs
- Ensuring product vendor support
- Resolving software bugs or defects
- Leveraging software functionality and/or performance

Evergreening is a continual process and a vital component of normal software environment maintenance. This process requires the effort and coordination of all parties involved: FSA stakeholders, software vendors, EAI Team, and the Virtual Data Center (VDC) personnel. Each party has a role and responsibility within the evergreening process, which is summarized in the following table:

| Role | Responsibility | Responsible Party |
|---|---|------------------------------------|
| Business Owner | <ul style="list-style-type: none">▪ Provide business drivers / software input▪ Provide approval for new software▪ Provide approval for architecture | FSA |
| Software Vendor | <ul style="list-style-type: none">▪ Provide Vendor Support▪ Provide software patches and releases | IBM CommerceQuest MQSoftware |
| Architecture, Development, and Testing Team | <ul style="list-style-type: none">▪ Provide overall architecture design▪ Provide input to software evergreening approach and schedule▪ Coordinate evergreening efforts with Data center and Software License Owner▪ Application / installation of new software, patches and maintenance releases in the EAI Development and Test environments.▪ Regression testing of EAI Production architecture with new software, patches and maintenance releases▪ Creation of change requests and provide installation documentation (if applicable) to request VDC for Production migration of software change | EAI Team |
| Data Center, Software License Owner | <ul style="list-style-type: none">▪ Provide input to software evergreening approach and schedule▪ Provide software media to Arch/Dev/Test team▪ Provide appropriate system administration and software installation assistance to Arch/Dev/Test team.▪ Application / installation of new software, patches and maintenance releases in the EAI Staging and Production environments.▪ Establish and re-new software license support agreements. | VDC |

3 Software Upgrades

This section provides the detailed information of software vendor patches, point, or maintenance releases to be applied to existing software in the EAI Architecture

3.1 WebSphere MQ Integrator (Formerly MQ Series Integrator)

WebSphere MQ Integrator provides the EAI Bus the intersystem message transformation, routing, and formatting capability.

3.1.1 Upgrade Summary

| | |
|---|--|
| Current Version | 2.0.1 (Client & Server) |
| Vendor End of Service Date for Current Version | 12/31/2002 |
| Target Version | 2.0.2 (Client & Server) |
| Release Date | December 14, 2001 |
| Reason for Change | Vendor end of service for current version |
| Benefits / New Functionality | <ul style="list-style-type: none">Transforms, augments and applies rules to message-based data, and routes and distributes it between high performance systemsIntegrates both existing and new applicationsIntegrates application and business data using dynamic content and topic-based publish/subscribe functionsVisualizes the application flow through a graphical development environmentAllows message formats to be defined through a variety of dictionaries, either those supplied with the product or from a third partySimplifies support for multiple environments with a variety of application adapters, templates and toolsProvides a fully scalable architecture to meet growing business needsHas an open, architectural framework which allows the use of built-in components with third-party offeringsExploits and complies with industry standards such as SQL and XMLProvides compatibility with relevant standards such as OMG, EJB, XML/EDI, ERP, CRM and SCM formatsAllows database updates under transactional controlIntegrates with MQSeries transaction control and allows end-to-end transaction co-ordination of application integrationOptimizes the functions of MQSeries Integrator Version 2, and supports and exploits the functions of MQSeries Version 5.2 which is shipped with the productImproves usability in the development environment via a new integrated, interactive visual message flow debugger and a node development wizardEnhances support for remote users with direct support for MQSeries Everyplace and SCADA clientsImproves support for New Era of Networks Version 5.2 and the Message Repository Manager (MRM) to provide backward compatibility with rules, formats and templatesSupports 10 national languagesSignificantly increases integration opportunities - in addition to enhancements to the AIX, Sun Solaris, and Windows® |

| | |
|--|---|
| | versions, the latest release also supports HP-UX and the iSeries (AS/400) (using the Integrated xSeries Server {IXS} to implement MQSeries Integrator for Windows) <ul style="list-style-type: none">▪ Includes transactional support for Oracle. |
| Upgrade Cost | Covered under existing maintenance agreement |
| Operating Systems Supported | <ul style="list-style-type: none">▪ Server - Sun Solaris 8 (requires fix 109147-06 from Sun),▪ Client - Windows NT Server/Workstation 4.0 (SP5 or SP6a) |
| Vendor End of Service Date for Target Version | <ul style="list-style-type: none">▪ Sun Solaris 8 – 12/31/2003▪ Windows NT – 12/31/2003 |
| Software License Owner | CSC – VDC |

3.1.2 Systems Affected

| System / Application | Environment | Server | Operating System |
|-----------------------------|--------------------|---------------|-------------------------|
| MQSI Control Center | Development | SFANT006 | Windows NT 4.0 |
| EAI Bus | Test | SU35E17 | Solaris 7 |
| MQSI Control Center | Production | Ombuds_OAS | Windows NT 4.0 |
| EAI Bus | Production (1) | SU35E3 | Solaris 7 |
| EAI Bus | Production (2) | SU35E14 | Solaris 7 |

3.2 IBM DB2 Universal Database

IBM DB2 serves as the back end data store for WebSphere MQ Integrator.

3.2.1 Upgrade Summary

| | |
|---|---|
| Current Version | v 6.1, FixPak 11 Upgrade in progress. Applied to Dev/Test. Waiting on VDC to apply to Production (VDCMP-00000903) |
| Vendor End of Service Date for Current Version | 12/31/2001 |
| Target Version | v 7.2, FixPak 7 |
| Release Date | September 9, 2002 |
| Reason for Change | Vendor end of service for current version |
| Benefits / New Functionality | <ul style="list-style-type: none">Upgrade required for support and version compatibility with WebSphere MQSeries Integrator v2.0.2. |
| Upgrade Cost | Covered under existing maintenance agreement |
| Operating Systems Supported | <ul style="list-style-type: none">Server - Sun Solaris 8 (requires fix 109147-06 from Sun),Windows NT Server/Workstation 4.0 (SP5 or SP6a) |
| Vendor End of Service Date for Target Version | <ul style="list-style-type: none">Sun Solaris 8 – 03/31/2004Windows NT – 03/31/2004 |
| Software License Owner | CSC – VDC |

3.2.2 Systems Affected

| System / Application | Environment | Server | Operating System |
|-----------------------------|--------------------|---------------|-------------------------|
| MQSI Control Center | Development | SFANT006 | Windows NT 4.0 |
| EAI Bus | Test | SU35E17 | Solaris 7 |
| MQSI Control Center | Production | Ombuds_OAS | Windows NT 4.0 |
| EAI Bus | Production (1) | SU35E3 | Solaris 7 |
| EAI Bus | Production (2) | SU35E14 | Solaris 7 |

3.3 WebSphere MQ (Formerly MQ Series)

WebSphere MQ is the messaging backbone, which is the core of the EAI bus.

3.3.1 Upgrade Summary

| | |
|---|--|
| Current Version | 5.2 |
| Vendor End of Service Date for Current Version | 12/31/2003 |
| Target Version | 5.3** |
| Release Date | ▪ July 26, 2002, for HP-UX, Sun Solaris and Windows (Media) |
| Reason for Change | Vendor end of service for current version |
| Benefits / New Functionality | <p>Version 5 Release 3 offers added security using Secure Sockets Layer (SSL), the Internet standard for secure communication. There are enhanced features for performance—especially for JMS (Java Message Service) applications, making WebSphere MQ the JMS provider of choice. Other features have been added to enhance system scalability and reliability, particularly useful for clustering of systems that can share workload.</p> <ul style="list-style-type: none">▪ Security Enhancements: SSL provides a comprehensive solution for security problems with:<ul style="list-style-type: none">▪ 128-bit encryption to prevent eavesdropping▪ Message Integrity Checking to prevent tampering▪ Authentication to prevent impersonation▪ A range of cryptographic algorithms▪ Support for public/private keys▪ No key distribution problems▪ Performance Improvements: Performance is optimized for general MQ operation and for JMS. Scalability and performance improvements offer more design choices for system designers.▪ API Crossing Exit: The API crossing exit is a general-purpose framework to allow applications to add their own exits independently from others. An exit point is available in the MQI libraries that can call a chain of functions that operate on the MQI parameters. |
| Upgrade Cost | Covered under existing maintenance agreement |
| Operating Systems Supported | <ul style="list-style-type: none">▪ z/OS – z/OS 1.1 or higher▪ Sun Solaris 7 / 8▪ HP-UX V11.0 with relevant Year 2000 fixes▪ HP-UX V11i (11.11) |
| Vendor End of Service Date for Target Version | <ul style="list-style-type: none">▪ z/OS – Not Specified▪ Sun Solaris – 12/31/2004▪ HP – UX – 12/31/2004 |
| Software License Owner | CSC - VDC |

****Note:** The following APARs need to be applied as part of the upgrade to WebSphere MQ v5.3:

- PQ62235 – Applied to v5.2 before v5.3 upgrade is applied
- PQ62766 – Applied after v5.3 upgrade is applied
- PQ62777 – Applied after v5.3 upgrade is applied

3.3.2 Systems Affected

| System / Application | Environment | Server | Operating System |
|---------------------------|--------------------|----------|------------------|
| Data Mart | Development | HPV1 | HP-UX 11.0 |
| Data Mart | Development | HPN25 | HP-UX 11.0 |
| EAI Bus | Development | SU35E16 | Solaris 7 |
| FAFSA | Development | HPA2 | HP-UX 11.0 |
| LOWeb | Development | HPL12 | HP-UX 11.0 |
| MQSI Control Center | Development | SFANT006 | Windows NT 4.0 |
| CPS | Development / Test | CPSED | OS/390 |
| DLSS | Development / Test | CRDEV2 | OpenVMS |
| EAI WAS, eCB, Informatica | Development / Test | SU35E5 | Solaris 2.6 |
| FMS | Development / Test | HPL6 | HP-UX 11.0 |
| FMS | Development / Test | HPL7 | HP-UX 11.0 |
| NSLDS | Development / Test | NSLSYSP | OS/390 |
| SAIG / bTrade | Development / Test | HPL15 | HP-UX 11.0 |
| EAI Bus | Test | SU35E17 | Solaris 7 |
| FAFSA | Test | HPN3 | HP-UX 11.0 |
| FAFSA | Test | HPN8 | HP-UX 11.0 |
| CPS | Production | CPSED | OS/390 |
| DLSS | Production | CRPAS1 | OpenVMS |
| FAFSA | Production | HPN2 | HP-UX 11.0 |
| FAFSA | Production | HPN2 | HP-UX 11.0 |
| FAFSA | Production | HPN15 | HP-UX 11.0 |
| FAFSA | Production | HPN7 | HP-UX 11.0 |
| FAFSA | Production | HPN16 | HP-UX 11.0 |
| FAFSA | Production | HPN17 | HP-UX 11.0 |

| System / Application | Environment | Server | Operating System |
|----------------------|----------------|------------|------------------|
| FAFSA | Production | HPN26 | HP-UX 11.0 |
| FAFSA | Production | HPN5 | HP-UX 11.0 |
| FAFSA | Production | HPN19 | HP-UX 11.0 |
| FAFSA | Production | HPN21 | HP-UX 11.0 |
| FAFSA | Production | HPN23 | HP-UX 11.0 |
| FAFSA | Production | HPN27 | HP-UX 11.0 |
| FMS / Data Mart | Production | HPV2 | HP-UX 11.0 |
| Informatica | Production | SU35E18 | Solaris 2.6 |
| LOWeb | Production | HPL13 | HP-UX 11.0 |
| MQSI Control Center | Production | Ombuds_OAS | Windows NT 4.0 |
| NSLDS | Production | NSLSYSP | OS/390 |
| PEPS | Production | HPK2 | HP-UX 10.2 |
| SAIG / bTrade | Production | HPL16 | HP-UX 11.0 |
| EAI Bus | Production (1) | SU35E3 | Solaris 7 |
| EAI WAS - eCB | Production (1) | SU35E9 | Solaris 2.6 |
| EAI Bus | Production (2) | SU35E14 | Solaris 7 |
| EAI WAS - eCB | Production (2) | SU35E13 | Solaris 2.6 |

3.4 SupportPac MA0F: MQSeries Application Messaging Interface (AMI)

The MQSeries Application Messaging Interface (AMI) is a simple application programming interface, providing support for point-to-point and publish/subscribe messaging.

3.4.1 Upgrade Summary

| | |
|---|--|
| Current Version | 1.2 |
| Vendor End of Service Date for Current Version | 12/31/2003 |
| Target Version | IBM has not published the subsequent version of AMI that is compatible with MQSeries v5.3. A support inquiry has been logged with IBM. |
| Release Date | November 15, 2002 |
| Reason for Change | Vendor end of service for current version |
| Benefits / New Functionality | ▪ N/A |
| Upgrade Cost | Covered under existing maintenance agreement |
| Operating Systems Supported | ▪ Server – HP-UX |
| Vendor End of Service Date for Target Version | ▪ TBD |
| Software License Owner | CSC – VDC |

3.4.2 Systems Affected

| System / Application | Environment | Server | Operating System |
|-----------------------------|--------------------|---------------|-------------------------|
| FMS | Development / Test | HPL6 | HP-UX 11.0 |
| FMS | Development / Test | HPL7 | HP-UX 11.0 |
| LOWeb | Development | HPL12 | HP-UX 11.0 |
| FMS / Data Mart | Production | HPV2 | HP-UX 11.0 |
| LOWeb | Production | HPL13 | HP-UX 11.0 |

4 New Software

This section provides the detailed information of new software to be added to the EAI Architecture.

4.1 MQSoftware QPasa!

QPasa! provides configuration management, deployment, and monitoring capabilities of WebSphere MQ components for the EAI Architecture.

4.1.1 Install Summary

| | |
|--|--|
| Target Version | 3.1 |
| Release Date | Planned GA Release 3/1/2003 |
| Benefits / New Functionality | <ul style="list-style-type: none">New Java-based Management Console for Configuration client |
| Software Cost | Purchased by CSC – VDC |
| Operating Systems Supported | Agents - MQ Series supported platforms Client/Server - Windows NT |
| Vendor End of Service Date for Target Version | No defined date |
| Software License Owner | CSC – VDC |

4.1.2 Systems Affected

| System / Application | Environment | Server | Operating System |
|-----------------------------|--------------------|---------------|-------------------------|
| MQSI Control Center | Development | SFANT006 | Windows NT 4.0 |
| EAI Bus | Development | SU35E16 | Solaris 7 |
| EAI Bus | Test | SU35E17 | Solaris 7 |
| MQSI Control Center | Production | Ombuds_OAS | Windows NT 4.0 |
| EAI Bus | Production (1) | SU35E3 | Solaris 7 |
| EAI Bus | Production (2) | SU35E14 | Solaris 7 |

4.2 WebSphere MQ Workflow

Currently, WebSphere MQ Workflow v3.3 is purchased and available for install, but lacks the business driver to warrant its implementation at this time. There are plans to install the product to familiarize and better understand the functionality and limitations in preparation for future implementation.

4.2.1 Install Summary

| | |
|-------------------------------------|--|
| Target Version | 3.3.2 |
| Release Date | 12/2001 |
| Benefits / New Functionality | ▪ Workflow capabilities integrated with WebSphere MQ |
| Software Cost | Covered under existing maintenance agreement |
| Operating Systems Supported | HP-UX, Sun Solaris, Windows NT, z/OS |
| Vendor End of Service Date | 6/30/2003 |
| Software License Owner | CSC |

4.2.2 Systems Affected

| System / Application | Environment | Server | Operating System |
|-----------------------------|--------------------|---------------|-------------------------|
| EAI Bus | Development | SU35E16 | Solaris 7 |
| EAI Bus | Test | SU35E17 | Solaris 7 |

5 Future Software Changes

Provides a summary of the known software changes not in the current Evergreening scope, but on the horizon and should be considered in future planning. These changes are not currently planned and will not be implemented during this fiscal year.

5.1 CommerceQuest Data Integrator

Data Integrator provides the EAI Bus with a high-speed, transport mechanism for transferring large amounts of data between systems.

5.1.1 Upgrade Summary

| | |
|---|---|
| Current Version | 4.2.4 |
| Vendor End of Service Date for Current Version | Not defined by Vendor |
| Target Version | 4.3.2 |
| Release Date | 7/31/2002 |
| Benefits / New Functionality | XML Integration for Sun Solaris, HP-UX, MVS |
| Upgrade Cost | Covered under existing maintenance agreement |
| Operating Systems Supported | <ul style="list-style-type: none">▪ Sun Solaris 7 / 2.8▪ HP-UX 10 / 11 |
| Vendor End of Service Date for Target Version | Not defined by Vendor |
| Software License Owner | CSC – VDC (Transfer to CSC in progress) |

5.1.2 Systems Affected

| System / Application | Environment | Server | Operating System |
|-----------------------------|--------------------|---------------|-------------------------|
| Data Mart | Development | HPV1 | HP-UX 11.0 |
| EAI Bus | Development | SU35E16 | Solaris 7 |
| CPS | Development / Test | CPSED | OS/390 |
| DLSS | Development / Test | CRDEV2 | OpenVMS |
| EAI WAS, eCB, Informatica | Development / Test | SU35E5 | Solaris 2.6 |
| FMS | Development / Test | HPL6 | HP-UX 11.0 |
| NSLDS | Development / Test | NSLSYSP | OS/390 |
| SAIG / bTrade | Development / Test | HPL15 | HP-UX 11.0 |
| EAI Bus | Test | SU35E17 | Solaris 7 |
| CPS | Production | CPSED | OS/390 |
| DLSS | Production | CRPAS1 | OpenVMS |
| FMS / Data Mart | Production | HPV2 | HP-UX 11.0 |

| System / Application | Environment | Server | Operating System |
|----------------------|----------------|---------|------------------|
| Informatica | Production | SU35E18 | Solaris 2.6 |
| NSLDS | Production | NSLSYSP | OS/390 |
| PEPS | Production | HPK2 | HP-UX 10.2 |
| SAIG / bTrade | Production | HPL16 | HP-UX 11.0 |
| EAI Bus | Production (1) | SU35E3 | Solaris 7 |
| EAI WAS – eCB | Production (1) | SU35E9 | Solaris 2.6 |
| EAI Bus | Production (2) | SU35E14 | Solaris 7 |
| EAI WAS – eCB | Production (2) | SU35E13 | Solaris 2.6 |

5.2 Sun Java™ 2 SDK, Standard Edition (J2SE), v1.4.0

The J2SE contains the essential compiler, tools, runtimes, and APIs for writing, deploying, and running applets and applications in the Java programming language. Formerly referred to as JDK.

5.2.1 Upgrade Summary

| | |
|---|---|
| Current Version | 1.2.0 |
| Vendor End of Service Date for Current Version | Not available |
| Target Version | 1.4.0 |
| Release Date | 5/17/2001 |
| Benefits / New Functionality | http://java.sun.com/j2se/1.4/docs/relnotes/features.html |
| Upgrade Cost | Covered under existing maintenance agreement |
| Operating Systems Supported | Sun Solaris 7 / 8* Window NT HP-UX 10 / 11 |
| Vendor End of Service Date for Target Version | |
| Software License Owner | |

***Note:** Sun Recommends the *J2SE Solaris 7 Recommended Patch Cluster* (<http://sunsolve.sun.com/pub-cgi/show.pl?target=patches/J2SE>). These recommended patches are considered the most important and highly recommended patches that avoid the most critical system, user, or other bugs related to the functionality of the Java platform on the Solaris Operating Environment which have been reported and fixed to date.

5.2.2 Systems Affected

| System / Application | Environment | Server | Operating System |
|---------------------------|--------------------|---------|------------------|
| Data Mart | Development | HPV1 | HP-UX 11.0 |
| EAI Bus | Development | SU35E16 | Solaris 7 |
| CPS | Development / Test | CPSED | OS/390 |
| DLSS | Development / Test | CRDEV2 | OpenVMS |
| EAI WAS, eCB, Informatica | Development / Test | SU35E5 | Solaris 2.6 |
| FMS | Development / Test | HPL6 | HP-UX 11.0 |
| NSLDS | Development / Test | NSLSYSP | OS/390 |
| SAIG / bTrade | Development / Test | HPL15 | HP-UX 11.0 |
| EAI Bus | Test | SU35E17 | Solaris 7 |
| CPS | Production | CPSED | OS/390 |
| DLSS | Production | CRPAS1 | OpenVMS |

| System / Application | Environment | Server | Operating System |
|----------------------|----------------|---------|------------------|
| FMS / Data Mart | Production | HPV2 | HP-UX 11.0 |
| Informatica | Production | SU35E18 | Solaris 2.6 |
| NSLDS | Production | NSLSYSP | OS/390 |
| PEPS | Production | HPK2 | HP-UX 10.2 |
| SAIG / bTrade | Production | HPL16 | HP-UX 11.0 |
| EAI Bus | Production (1) | SU35E3 | Solaris 7 |
| EAI WAS - eCB | Production (1) | SU35E9 | Solaris 2.6 |
| EAI Bus | Production (2) | SU35E14 | Solaris 7 |
| EAI WAS - eCB | Production (2) | SU35E13 | Solaris 2.6 |

6 Evergreening Schedule

The EAI Evergreening schedule is a point in time representation of the delivery milestones for the software changes defined in this document. The implementation of the new software packages and upgrades are dependent on a number of external factors including COD 2.0 development and testing, other development initiatives, and resource constraints.

| ID | Task Name | Start | End | Responsible Party | Q1 03 | | | Q2 03 | | | Q3 03 | | | Q4 03 | | | |
|----|--------------------------------------|-----------|-----------|-------------------|---|-----|-----|-------|-----|-----|-------|-----|-----|-------|-----|-----|--|
| | | | | | Jan | Feb | Mar | Apr | May | Jun | Jul | Aug | Sep | Oct | Nov | Dec | |
| 1 | DB2 v6.1 Fix Pack 11- Dev/Test | 1/6/2003 | 1/10/2003 | EAI |  | | | | | | | | | | | | |
| 2 | DB2 v6.1 Fix Pack 11- Staging / Prod | 1/13/2003 | 3/12/2003 | VDC |  | | | | | | | | | | | | |
| 3 | COD 2.0 IST / UAT | 2/3/2003 | 4/18/2003 | COD |  | | | | | | | | | | | | |
| 4 | MQSI v2.0.2 - Dev/Test | 4/21/2003 | 5/2/2003 | EAI |  | | | | | | | | | | | | |
| 5 | MQSI v2.0.2 - Staging / Prod | 5/5/2003 | 5/16/2003 | VDC |  | | | | | | | | | | | | |
| 6 | DB2 v7.2 Fix Pack 7 - Dev/Test | 5/5/2003 | 5/16/2003 | EAI |  | | | | | | | | | | | | |
| 7 | DB2 v7.2 Fix Pack 7 - Staging / Prod | 5/19/2003 | 5/30/2003 | VDC |  | | | | | | | | | | | | |
| 8 | MQ Series v5.3 - Dev/Test | 5/19/2003 | 7/11/2003 | EAI |  | | | | | | | | | | | | |
| 9 | MQ Series v5.3 - Staging / Prod | 6/2/2003 | 8/29/2003 | VDC |  | | | | | | | | | | | | |
| 10 | Qpasal - Dev/Test | 1/6/2003 | 2/12/2003 | EAI |  | | | | | | | | | | | | |
| 11 | Qpasal - Staging / Production | 1/6/2003 | 5/5/2003 | VDC |  | | | | | | | | | | | | |
| 12 | MQ Workflow - Dev / Test | 8/18/2003 | 8/22/2003 | EAI |  | | | | | | | | | | | | |

Schedule Assumptions:

- MQSeries v5.3 upgrade assumes that 2 servers will be upgraded per week for the Development /Test and the Staging/Production.
- VDC will ensure the Staging environment is upgraded.
